

## Vin Santo

Felsina enjoys a long tradition of making Vin Santo, focusing on quality and a signature style. Grapes first dry on mats and are placed in traditional *caratelli* (small barrels especially for Vin Santo) with the "mother" yeast, left from previous vintages. The barrels are located in a *Vinsantaia* in the attic or loft of the cellars, which subject them to the various temperature changes of the four seasons, with fermentation starting and slowing with each change. Felsina not only uses Trebbiano and Malvasia grapes, it also uses some Sangiovese for a faceted and unique dessert wine. After seven years, the Vin Santo is bottled and aged for a minimum of six months in bottle. This version features structure, acidity, and balance between the various components as well as an endless finish.

Wine exported to: Bermuda, Canada, Australia
